Motion Sensing Key Fob for keyless entry, with Ford logo

Fight back against car theft by upgrading to new Ford security technology. The new motion sensing key fob disables itself while not in use to block keyless hacking from relay box equipment and stops entry to your vehicle.

The new motion sensing key fob detects when it has been stationary for longer than 40 seconds and triggers a sleep mode. This stops all attempts to hack its signal with a relay box. Moving the fob by picking it up inside your home and walking to your vehicle disables sleep mode and restores full functionality. Ford fobs are designed to operate within a 2 metre radius of the cars they are bonded to.
