Securely fix any attachment you require for your transportation needs. Base carriers or cross bars for vehicles with roof rails are mandatory to install any carrier or box to your vehicle.

The ultra sleek, low profile and lightweight roof base rack is mounted close to the vehicle's roofline thanks to its superior strength. Constructed from fully welded extruded aluminium with a cross beam design, each internal and perimeter beam is made from a single seamless extruded aluminium box piece with internal bracing for added strength, so there is no requirement for a supporting subframe. The roof base rack also boasts a revolutionary sliding dovetail side-mounting system that makes attaching, repositioning and removing loads and accessories easier, faster and more secure.

To be used in combination with the ARB cabin fitting kit (available separately)

- Unique one-piece design for strength and durability
- Roof base rack provides unmatched simplicity, flexibility and personalization in your roof rack set up
- The dovetail side-mounting system frees up more uninterrupted cargo space along the top of each beam
- Endless mounting and attachment options
